JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 248 (1988)

SUBJECT INDEX

Acetonitrile,
cathodic reduction of diphenyl selenide in ——— (Degrand et al.) 381
Acrylonitrile,
ultramicroelectrodes for the study of the mechanism of electrosynthetic reactions. The hydrodimerisation of ——— (Montenegro, Pletcher) 229
Aluminium,
electrodeposition of ——— in aluminium chloride/1-methyl-3-ethylimidazolium chloride (Lai, Skyllas-Kazacos) 431
Potentiometric titration of ——— with fluoride in organic solvent + water mixtures by use of a fluoride-selective electrode (Radić et al.) 87
Aluminium chloride,
electrodeposition of aluminium in ——— /1-methyl-3-ethylimidazolium chloride (Lai, Skyllas-Kazacos) 431
ARMCO–iron,
relationship between the underpotential deposition of zinc and the penetration of hydrogen in ——— substrates (Rashkov et al.) 421

1,4-Benzoquinone,
effect of carbon dioxide on the electroreduction of ——— (Bulhões, Zara) 159

Calcium,
radiotracer study of the adsorption of Ca^{2+} ions on a platinized platinum electrode in acid medium (Horányi, Rizmayer) 411
Carbon,
electrochemical and spectroscopic characterization of a gold plated reticulated vitreous ——— thin-layer electrode (Zamponi et al.) 341
Pyrolytic ——— film electrode for votltammetry. Part V. Characterization and comparison with the glassy carbon electrode by electrochemical pretreatment in basic solution (Beilby, Carlsson) 283
Studies of surface-modified glassy ——— electrodes obtained by electrochemical treatment. Its effect on $Ru(bpy)_3^{2+}$ adsorption and the electron-transfer rates of the Fe^{2+}/Fe^{3+} couple (Barbero et al.) 321
Carbon dioxide,
effect of ——— on the electroreduction of 1,4-benzoquinone (Bulhões, Zara) 159
Catalytic-deactivation mechanism,
theory of the chronoamperometric and polarographic response of the ——— (Galvez et al.) 23
Chemically modified electrodes,
in-situ surface EXAFS at ——— (Albarelli et al.) 77
Chlorogallium phthalocyaninine,
chemical modification of ——— thin film photoelectrodes (Nanthakumar, Armstrong) 349
Copper,
electrochemical nucleation and growth of ——— on polycrystalline palladium (Rigano et al.) 219
Coulostatics,
laser-induced temperature-jump ——— for the investigation of heterogeneous rate processes. Theory and application (Smalley et al.) 255
Cyanide,
electrochemistry of the nickel–——— system at mercury electrodes. Part III. The role of intermediate products in the mechanism of $Ni(CN)_4^{2-}$ electroreduction at mercury electrodes (Orlik, Galus) 139

Dicarboxylic ions,
adsorption of ——— on the (311) face of

0022-0728/88/$03.50 © 1988 Elsevier Sequoia S.A.

gold from solutions at constant cationic strength (Dutkiewicz et al.) 209
Dimethylsulphoxide,
adsorption of ——— on the polycrystalline gold electrode from aqueous solutions (Jarząbek, Borkowska) 399
Di-oleoyl lecithin,
phospholipid monolayers of ——— (di-O-PC) at the mercury/water interface. Effects of faradaic reactions (Nelson, Auffret) 167
Diphenyl selenide,
cathodic reduction of ——— in acetonitrile (Degrand et al.) 381

Electrode kinetics,
chronocoulometric study of ——— in the case of an adsorbed redox couple. Progesterone electroreducton on mercury from aqueous solutions (Sastre de Vicente et al.) 55
Measurement of ultrafast ——— via steady-state voltammograms at microdisc electrodes (Oldham et al.) 467
EXAFS,
in-situ surface ——— at chemically modified electrodes (Albarelli et al.) 77

Fluoride,
potentiometric titration of aluminium with ——— in organic solvent + water mixtures by use of a fluoride-selective electrode (Radić et al.) 87
Fluoride-selective electrode,
potentiometric titration of aluminium with fluoride in organic solvent + water mixtures by use of a ——— (Radić et al.) 87

Gas-diffusion electrodes,
a novel application of ——— as electrochemical gas sensors (Cha et al.) 69
Gibbs energy of transfer,
electrode processes in mixed solvents. Correlations between electrochemical rate constants and ——— (Maksymiuk et al.) 35
Gold,
adsorption of dicarboxylic ions on the (311) face of ——— from solutions at constant cationic strength (Dutkiewicz et al.) 209
Adsorption of dimethylsulphoxide on the polycrystalline ——— electrode from aqeous solutions (Jarząbek, Borkowska) 399
Electrochemical and spectroscopic characterization of a ——— plated reticulated vitreous carbon thin-layer electrode (Zamponi et al.) 341
In-situ scanning tunneling microscopy study of ——— (111) with atomic scale resolution (Wiechers et al.) 451
Study of the electrooxidation of 1,2-propanediol on an ——— electrode in basic medium (Alonso, Gonzalez-Velasco) 193

Halogen ion,
electrical breakdown and pitting in anodic films on tungsten in ———-containing solutions (Di Quarto et al.) 117
Hydrogen,
relationship between the underpotential deposition of zinc and the penetration of ——— in ARMCO–iron substrates (Rashkov et al.) 421

Indium selenide,
stabilization of the polycarbazole protected ——— photoanode for photoelectrochemical solar cells (Levy Clement et al.) 233
Ionophores,
exchange of K^+ and Na^+ between water and PVC in the presence of different ——— (Armstrong, Todd) 131
Iron,
electroreduction of Ni^{2+} and Fe^{2+} in a fused electrolyte. Formation of a two-component alloy and the role of the underpotential deposition (Lantelme et al.) 369
Studies of surface-modified glassy carbon electrodes obtained by electrochemical treatment. Its effect on $Ru(bpy)_3^{2+}$ adsorption and the electron-transfer rates of the Fe^{2+}/Fe^{3+} couple (Barbero et al.) 321

Laser,
———-induced temperature-jump coulostatics for the investigation of heterogeneous rate processes. Theory and application (Smalley et al.) 255

Mercury,
chronocoulometric study of electrode kinetics in the case of an adsorbed redox couple. Progesterone electroreduction on ——— from aqueous solutions (Sastre de Vicente et al.) 55
Electrochemistry of the nickel–cyanide system at ——— electrodes. Part III. The role of intermediate products in the mechanism of

$Ni(CN)_4^{2-}$ electroreduction at mercury electrodes (Orlik, Galus) 139
Phospholipid monolayers of di-oleoyl lecithin (di-O-PC) at the ———/water interface. Effects of faradaic reactions (Nelson, Auffret) 167
Methanol,
catalysis of the electrochemical oxidation of ——— by molybdenum-modified platinum (Kita et al.) 181
1-Methyl-3-ethylimidazolium chloride,
electrodeposition of aluminium in aluminium chloride/——— (Lai, Skyllas-Kazacos) 431
3-Methyl-2-oxazolidone,
electrochemical studies in ——— (Kelly, Heineman) 441
Microdisc electrodes,
measurement of ultrafast electrode kinetics via steady-state voltammograms at ——— (Oldham et al.) 467
Mixed solvents,
electrode processes in ———. Correlations between electrochemical rate constants and Gibbs energy of transfer (Maksymiuk et al.) 35
Molybdenum,
catalysis of the electrochemical oxidation of CH_3OH by ———-modified platinum (Kita et al.) 181

Nickel,
electrochemistry of the ———-cyanide system at mercury electrodes. Part III. The role of intermediate products in the mechanism of $Ni(CN)_4^{2-}$ electroreduction at mercury electrodes (Orlik, Galus) 139
Electroreduction of Ni^{2+} and Fe^{2+} in a fused electrolyte. Formation of a two-component alloy and the role of the underpotential deposition (Lantelme et al.) 369

Palladium,
electrochemical nucleation and growth of copper on polycrystalline ——— (Rigano et al.) 219
Phospholipid monolayers,
——— of di-oleoyl lecithin (di-O-PC) at the mercury/water interface. Effects of faradaic reactions (Nelson, Auffret) 167
Platinum,
catalysis of the electrochemical oxidation of CH_3OH by molybdenum-modified ——— (Kita et al.) 181
Radiotracer study of the adsorption of Ca^{2+} ions on a platinized ——— electrode in acid medium (Horányi, Rizmayer) 411
Polycarbazole,
stabilization of the ——— protected n-InSe photoanode for photoelectrochemical solar cells (Levy Clement et al.) 233
Polyvinylchloride,
exchange of K^+ and Na^+ between water and ——— in the presence of different ionophores (Armstrong, Todd) 131
Potassium,
exchange of K^+ and Na^+ between water and PVC in the presence of different ionophores (Armstrong, Todd) 131
Potassium hydroxide,
electrochemisty of $YBa_2Cu_3O_{7-\delta}$ in aqueous ——— (Rochani et al.) 461
Progesterone,
chronocoulometric study of electrode kinetics in the case of an adsorbed redox couple. ——— electroreduction on mercury from aqeous solutions (Sastre de Vicente et al.) 55
1,2-Propanediol,
study of the electrooxidation of ——— on an Au electrode in basic medium (Alonso, Gonzalez-Velasco) 193
Protein conformomer,
hydrophillic and hydrophobic domains in the flat ——— as a cause of double step polarographic waves (Kuznetsov et al.) 387

Rate constants,
electrode processes in mixed solvents. Correlations between electrochemical ——— and Gibbs energy of transfer (Maksymiuk et al.) 35
Reaction rate,
evaluation of electrochemical ——— data using first order analytical models (Schott) 1
Ruthenium bipyridine,
studies of surface-modified glassy carbon electrodes obtained by electrochemical treatment. Its effects on ——— adsorption and the electron-transfer rates of the Fe^{2+}/Fe^{3+} couple (Barbero et al.) 321

Sodium,
exchange of K^+ and Na^+ between water and PVC in the presence of different ionophores (Armstrong, Todd) 131
Square-wave voltammetry,
——— of an adsorbed reactant (Lovrić, Komorsky-Lovrić) 239

Temperature-jump coulostatics,
laser-induced ——— for the investigation of heterogeneous rate processes. Theory and application (Smalley et al.) 255
Tris(dialkylamino)sulfonium salts,
new organic electrolytes: ——— : $(R_2N)_3S^+X^-$ (Becker et al.) 363
Tungsten,
electrical and mechanical breakdown of anodic films on ——— in aqueous electrolytes (Di Quarto et al.) 99
Electrical breakdown and pitting in anodic films on ——— in halogen ion-containing solutions (Di Quarto et al.) 117
Tungsten(VI, V) oxides,
electrochemical preparation of electrodes modified with non-stoichiometric mixed-valent ——— (Kulesza, Faulkner) 305

Ultramicroelectrodes,
———: cyclic voltammetry above one million V s^{-1} (Andrieux et al.) 447
——— for the study of the mechanism of electrosynthetic reactions. The hydrodimerisation of acrylonitrile (Montenegro, Pletcher) 229

Volume concept,
on the ——— for the Walden product (Iberl) 15

Walden product,
on the volume concept for the ——— (Iberl) 15

Yttrium–barium–copper oxide,
electrochemistry of $YBa_2Cu_3O_{7-\delta}$ in aqueous potassium hydroxide (Rochani et al.) 461

Zinc,
relationship between the underpotential deposition of ——— and the penetration of hydrogen in ARMCO–iron substrates (Rashkov et al.) 421
